Contents

PART 1

Administration Chapters 1 and 2

■ 1.1.7.3.1	Application of the CBC vs CRC	2
■ 101.2	Exempt Residential Accessory Structures	3
■ 111.1	Change of Use or Occupancy	5
■ Chapter 2	Definition of Covered Multifamily Dwellings	7
■ 202	Definition of Horizontal Exit	8
■ 202	Definition of Platform	9
■ 202	Definition of Private Garage	10
■ 202	Definition of Public Use Areas	11
■ 202	Definition of Treated Wood	12

PART 2

Building Planning Chapters 3 through 6

■ 304.1	Food Processing Facilities and Commercial Kitchens	15
---------	--	----

■ 304.1	Training and Skill Development Facilities	17
■ 305.2.1	Day Care Within Places of Religious Worship	19
■ 306.2	Food Processing Facilities and Commercial Kitchens	20
■ 310.5	Group R-3 Lodging Houses	22
■ 310.5.2	Lodging Houses	24
■ 311.1.1	Classification of Accessory Storage Spaces	25
■ 404.5, Exception	Atrium Smoke Control in Group I Occupancies	27
■ 404.9, 404.10	Egress Travel through an Atrium	28
■ 406.3.1	Private Garage Floor—Area Limitation	29
■ 406.3.2	Private Parking Garage Ceiling Height	30
■ 406.6.2	Garage Ventilation	31
■ 407.2.5	Group I-2 Shared Living Spaces	32
■ 407.2.6	Group I-2 Cooking Facilities	34

iv CONTENTS

■ 410.3.5 Horizontal Sliding Doors at Stage Proscenium Opening	36	■ 705.3 Buildings on the Same Lot	75
■ 412.7 Travel Distance in Aircraft Manufacturing Facilities	38	■ 705.6 Structural Element Bracing of Exterior Walls	78
■ 420.7 Construction Waste Management	40	■ 705.8.5 Vertical Separation of Openings	80
■ 420.9 Electric Vehicle Charging Stations	41	■ 706A.2 and 706A.3 Ventilation Opening Protection	82
■ 444 Explosives	42	■ 706.2 Structural Stability of Fire Walls	84
■ 503 General Building Height and Area Limitations	45	■ 707A.5 through 707A.9 Protection of Eaves and Other Projections	85
■ Tables 504.3, 504.4 Building Height and Number of Stories	47	■ 709.4 Continuity of Smoke Barriers	87
■ 505.2.3, Exception 2 Mezzanine Openness	50	■ 711, 712 Horizontal Assemblies and Vertical Openings	89
■ Table 506.2 Allowable Area Determination	52	■ 714.4.2 Membrane Penetrations	95
■ 507.1 Basements in Unlimited Area Buildings	54	■ 717.1.1 Ducts Transitioning between Shafts	97
■ 507.9 Group H-5 in Unlimited Area Buildings	55	■ 717.3, 717.5 Corridor Dampers	99
■ 510.2 Horizontal Building Separation	57	■ 903.2.1.6 Sprinkler Systems—Assembly Occupancies	103
■ Table 601, Footnote d One-Hour Substitution	60	■ 903.2.1.7 Multiple Fire Areas	105
■ 602.4 Type IV Member Size Equivalencies	62	■ 903.2.8 Sprinkler Systems—Group R Occupancies	107
■ 602.4.2 Cross-Laminated Timber in Exterior Walls	64	■ 903.3.1.2.2 Open-Ended Corridors	110
■ 603.1, Item 26 Wall Construction of Freezers and Coolers	65	■ 903.3.8 Limited Area Sprinkler Systems	112
PART 3		■ 907.2.3 Fire Alarms—Group E Occupancies	115
Fire Protection		■ 907.2.9.3 Alarm Systems—Group R-2 College and University Buildings	117
Chapters 7 through 9	67	■ 909.21.1 Elevator Hoistway Pressurization	119
■ 704.4 Protection of Secondary Members	69	■ 910 Smoke and Heat Removal	123
■ 705.2 Projections at Exterior Walls	71	■ 915 Carbon Monoxide Detection	129
■ 705.2.3 Combustible Projections	74		

PART 4		PART 5	
Means of Egress		Building Envelope, Structural	
Chapter 10	137	Systems, and Construction Materials	173
■ Chapter 10		■ 1405.3	
Means of Egress	138	Vapor Retarders	176
■ 1004.1.1		■ 1602.1	
Cumulative Occupant Loads	139	Definitions and Notations	179
■ Table 1004.1.2		■ 1603	
Occupant Load Factors	141	Construction Documents	182
■ 1004.3		■ 1603.1.7	
Posting of Occupant Load	143	Flood Design Data	183
■ 1006, 1007		■ 1603.1.8	
Numbers of Exits and Exit Access Doorways	144	Special Loads	185
■ 1007.1		■ 1604.3	
Exit and Exit Access Doorway Configuration	149	Serviceability	186
■ 1009.8		■ 1604.5	
Two-Way Communication Systems	151	Risk Category	189
■ 1010.1.9		■ 1607.5	
Door Operations—Locking Systems	153	Partition Loads	192
■ 1011.15, 1011.16		■ 1607.9	
Ships Ladders to Lifeguard Towers	156	Impact Loads for Façade Access Equipment	193
■ 1014.8		■ 1607.10.2	
Handrail Projections	158	Alternative Uniform Live Load Reduction	195
■ 1015.8		■ 1607.12	
Window Openings	160	Roof Loads	197
■ 1016.2		■ 1607.12.5	
Egress through Intervening Spaces	161	Photovoltaic Panel Systems	199
■ 1017.2.2		■ 1609.1.1	
Travel Distance Increase for Groups F-1 and S-1	163	Determination of Wind Loads	201
■ 1018.3		■ 1613.3.1	
Aisles in Groups B and M	165	Mapped Acceleration Parameters	203
■ 1020.2		■ 1613.5	
Corridor Width and Capacity	167	Amendments to ASCE 7	205
■ 1023.3.1		■ 1613.6	
Stairway Extension	169	Ballasted Photovoltaic Panel Systems	207
■ 1029.13.2.2.1		■ 1704.5	
Stepped Aisle Construction Tolerances	171	Submittals to the Building Official	209
		■ 1705.2	
		Steel Construction	211
		■ 1705.2.3	
		Open-Web Steel Joists and Joist Girders	214

Preface

The purpose of *Significant Changes to the California Building Code, 2016 Edition*, is to familiarize building officials, fire officials, plans examiners, inspectors, design professionals, contractors, and others in the construction industry with many of the important changes in the 2016 *California Building Code* (CBC). This publication is designed to assist those code users in identifying the specific code changes that have occurred and, more important, understanding the reasons behind the changes. It is also a valuable resource for jurisdictions in their code adoption process.

Only a portion of the total number of code changes to the CBC are discussed in this book. The changes selected were identified for a number of reasons, including their frequency of application, special significance, or change in application. However, the importance of the changes not included is not to be diminished. Further information on all code changes can be found in the *Complete Revision History to the 2015 I-Codes*, available from the International Code Council® (ICC®). The revision history provides the published documentation for each successful code change contained in the 2015 *International Building Code*® (IBC®) since the 2012 edition.

This book is organized into seven general categories, each representing a distinct grouping of code topics. It is arranged to follow the general layout of the CBC, including code sections and section number format. The table of contents, in addition to providing guidance in the use of this publication, allows for quick identification of those significant code changes that occur in the 2016 CBC.

Throughout the book, changes are accompanied by a photograph, an application example, or an illustration to assist and enhance the reader's understanding of the specific change. A summary and a discussion of the significance of the changes are also provided. Each code change is identified by type, be it an addition, modification, clarification, or deletion.

The code change itself is presented in a format similar to the style utilized for code change proposals. Deleted code language is shown with a strikethrough, whereas new code text is indicated by underlining. As a result, the actual 2016 code language is provided, as well as a comparison with the 2013 language, so the user can easily determine changes to the specific code text.

As with any code change text, *Significant Changes to the California Building Code, 2016 Edition*, is best used as a study companion to the 2016 CBC. Because only a limited discussion of each change is provided, the code itself should always be referenced in order to gain a more comprehensive understanding of the code change and its application.

The commentary and opinions set forth in this text are those of the authors and do not necessarily represent the official position of the ICC. In addition, they may not represent the views of any enforcing agency, as such agencies have the sole authority to render interpretations of the CBC. In many cases, the explanatory material is derived from the reasoning expressed by the code change proponent.

Comments concerning this publication are encouraged and may be directed to the ICC at significantchanges@iccsafe.org.

About the *International Building Code*[®]

Building officials, design professionals, and others involved in the building construction industry recognize the need for a modern, up-to-date building code addressing the design and installation of building systems through requirements emphasizing performance. The *International Building Code* (IBC), in the 2015 edition, is intended to meet these needs through model code regulations that safeguard the public health and safety in all communities, large and small. The IBC is kept up to date through the open code development process of the International Code Council (ICC). The provisions of the 2012 edition, along with those code changes approved through 2013, make up the 2015 edition.

The ICC, publisher of the IBC, was established in 1994 as a nonprofit organization dedicated to developing, maintaining, and supporting a single set of comprehensive and coordinated national model building construction codes. Its mission is to provide the highest-quality codes, standards, products, and services for all concerned with the safety and performance of the built environment.

The IBC is one of 15 International Codes[®] published by the ICC. This comprehensive building code establishes minimum regulations for building systems by means of prescriptive and performance-related provisions. It is founded on broad-based principles that make possible the use of new materials and new building designs. The IBC is available for adoption and use by jurisdictions internationally. Its use within a governmental jurisdiction is intended to be accomplished through adoption by reference, in accordance with proceedings establishing the jurisdiction's laws.

Acknowledgments

Within the International Code Council, special thanks go to Hamid Naderi, P.E., C.B.O., Senior Vice President, Business and Product Development, and Cindy Rodriguez, Product Development Manager, for coordinating the entire process; to Margaret Leddin, Vice President, Publishing and Multimedia, for editing the manuscript from draft to completion; to Lisa Triska, Sr. Graphic Designer, for her cover art and illustrative designs; and to Dave Walls, Executive Director, Sustainability Programs, who assisted in the technical review.

About the Authors

Paul D. Armstrong, P.E., C.B.O.

Principal
PACCS

Paul Armstrong is the Vice President of Public Works for CSG Consultants, Inc. He has worked for a number of private municipal consulting firms and in that capacity as the Building Official for the City of El Monte and Signal Hill. Prior to working for private firms, he worked for 14 years for the International Code Council and the International Conference of Building Officials, ending his time as the initial ICC Vice President of Architectural and Engineering Services. He also served as the drafting secretary for the 2000 *International Residential Code for One- and Two-family Dwellings*. Paul represented the model code organizations to many federal, state and local agencies and is a recognized lecturer on many code-related topics. He graduated from California State University at Long Beach. Paul is a Professional Engineer in the State of California and is a Certified Building Official.

Douglas W. Thornburg, AIA, C.B.O.

International Code Council
Vice President and Technical Director, Products and Services

Douglas W. Thornburg is currently Vice President and Technical Director of Products and Services for the International Code Council (ICC), where he provides administrative and technical leadership for the ICC Business and Product Development Group. Prior to employment with ICC in 2004, he spent nine years as a code consultant and educator on building codes.

Formerly Vice President/Education for the International Conference of Building Officials (ICBO), Doug continues to present building code seminars nationally and has developed numerous educational texts and resource materials. He was presented with ICC's inaugural Educator of the Year Award in 2008, recognizing his outstanding contributions in education and training.

A graduate of Kansas State University and a registered architect, Doug has over 33 years of experience in building code training and administration. He has authored a variety of code-related support publications, including the *IBC Handbook* and *Significant Changes to the International Building Code*.

John R. Henry, P. E.

John R. Henry is the former Principal Staff Engineer with the International Code Council (ICC) Business and Product Development Department, where he was responsible for the research and development of technical resources pertaining to the structural engineering provisions of the *International Building Code* (IBC). John also developed and presented technical seminars on the structural provisions of the IBC. He has a broad range of experience that includes structural design in private practice, plan-check engineering with consulting firms and building department jurisdictions, and 17 years as an International Conference of Building

Officials (ICBO)/ICC Staff Engineer. John graduated with honors from California State University in Sacramento with a Bachelor of Science Degree in Civil Engineering and is a Registered Civil Engineer in the State of California. He is a member of the Structural Engineers Association of California (SEAOC) and is an ICC Certified Plans Examiner. John has written several articles on the structural provisions of the IBC that have appeared in *Structure* magazine and *Structural Engineer* magazine's Code Series. He is also the coauthor of the 2012 IBC *Handbook* and coauthor with S. K. Ghosh, PhD, of the IBC *Handbook—Structural Provisions*.

Jay Woodward

International Code Council
Senior Staff Architect

Jay Woodward is a senior staff architect with the ICC's Business and Product Development department. With more than 31 years of experience in building design, construction, code enforcement, and instruction, Jay's experience provides him with the ability to address issues of code application and design for code enforcement personnel as well as architects, designers, and contractors. Jay has previously served as the Secretariat for the ICC A117.1 standard committee, ICC's *International Energy Conservation Code*, and the *International Building Code's* Fire Safety Code Development committee.

A graduate of the University of Kansas and a registered architect, Jay has also worked as an architect for the Leo A. Daly Company in Omaha, Nebraska; as a building plans examiner for the City of Wichita, Kansas; and as a senior staff architect for the International Conference of Building Officials (ICBO) prior to working for the ICC. He is also the author of *Significant Changes to the A117.1 Accessibility Standard, 2009 Edition*.

About the International Code Council®

The International Code Council is a member-focused association. It is dedicated to helping the building safety community and construction industry provide safe, sustainable and affordable construction through the development of codes and standards used in the design, build and compliance process. Most U.S. communities and many global markets choose the International Codes® (I-Codes)®. ICC Evaluation Service (ICC-ES), a subsidiary of the International Code Council, has been the industry leader in performing technical evaluations for code compliance, fostering safe and sustainable design and construction.
